Summary
Nebraska City and County Government
Blanket Addendum

Project: PayPort

This addendum covers all fees related to the collection of fees for PayPort.

Current Process:

PayPort is a service that was developed and has been in use by city and county government offices. Since this service was built so additional offices can be added at any time, a blanket addendum was approved by the Nebraska State Records Board.

Project Overview/Proposal:

New users since the last meeting include:

- City of Genoa, NE
- Village of Alda, NE
- Village of Ceresco, NE

Market Potential/Target Audience:

The market potential for this service is anyone that needs to pay fees owed to local government. PayPort offers the option for people to use a credit card when making a payment.

Information on what the fee presented is based upon:

This is a service that is unique, in that other vendors are offering ways to collect online payments. In order to be competitive, we set the rates of 2.49% for credit cards and \$1.75 for ACH. A blanket addendum was approved by the Nebraska State Records Board.

Anticipated volume of users of the application and what percentage of the total potential users is the anticipated volume:

The anticipated volume is not easily predicted. This is not a mandatory service. There are other payment options available to the customer.

Services that can be paid using this system may include licenses, swimming pool passes, hall rental fees, utilities, and motor vehicle titles.

Expected rate of return over a period of time:

The service continues to expand and offer new options. This involves continued development, testing and training. Customer service is always provided to the users.

The expected rate is not able to be estimated at this time. There are always fees that will be incurred with operating the online service.

NI's investment in this application (any costs incurred):

There was an initial investment to get the service ready to use. There is time spent to set up the service for new offices, including testing and training. There are additional, ongoing fees for running online applications such as customer service, security, back up servers, etc.

NI's risk in providing this application:

Anytime a transaction is completed online, there is a certain element of risk. NI provides the money to the partner, at times prior to receipt of that money. If there are any returns, NI has to research and gain those funds back from the partner.
